## **DETAILED ACTION**

### ***Oath/Declaration***

The new Oath/Declaration, and the Petition to correct inventorship received on 2/20/09 have been entered.

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given via facsimile by Attorney Raymond Mark .E. Stallion on 5/5/09.

**The application has been amended as follows:**

**Claims 1-5 are cancelled.**

In claim 6/lines 5-6, the language "**the ABS legacy systems**" was changed to **--ABS legacy systems--**.

In claim 6, lines 14-15,

claim 10, lines 11-13,

claim 13, lines 14-16,

claim 17, lines 154-16,

Art Unit: 3627

claim 21, lines 10-11,

-the language **"various object oriented applications executable at runtime to perform data binding, field definition and screen arrangement"** was changed to: **--various object oriented applications executed at runtime of the AR/POS application thereby performing data binding, field definition and screen arrangement in order to provide the AR/POS graphical user interface --.**

In claim 7, line 2, the language **"where the legacy systems include an account payable system"** was changed to: **-- where the ABS legacy systems include an account payable system --.**

In claim 18, line 2, the language **"a customer centric interface environment"** was changed to **-- the customer centric interface environment --**; and in lines 3-4, the language **"accounts relating to a given customer"** was changed to **-- accounts relating to the customer --**

In claim 20, line 2, the language **"the executing AR/POS application"** was changed to **-- the executed AR/POS application --.**

## REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The prior art, Berger et al. (US 7,120,677), disclose a customer care computing system having an executable AR/POS application operably stored thereon where said AR/POS application is operable to control the computing system to access customer care data relating to general customer data and AR/POS customer data from the ABS legacy systems and generate a graphical user interface presenting the customer care data; a collection of internet browser application functions including hyperlinks, push buttons, page forward and page backward functions included in said AR/POS application. Furthermore, *Berger et al. disclose* a system where said AR/POS application of said customer care computing system provides the graphical user interface operable to handle counter sales, orders, order tracking, and billing information.

However, Berger et al. lack the teaching means wherein the graphical user interface, is provided when the object oriented applications, which are linked to the group of integrated repositories, are executed at runtime and perform data binding, field definition and screen arrangement needed for the graphical user interface.

The limitation(s) lacking in the prior art, in combination with the other limitations clearly claimed in the application, are novel and unobvious.

An NPL search was also done.

The prior art “ **An Environment for the Organised Construction of User-Interfaces to Databases**” by **Kenneth J Mitchell and Jessie B Kennedy**” published by **Napier University, 1997** <http://www.soc.napier.ac.uk/publication/op/getpublication/publicationid/4151>

discloses a runtime user-interface development. However, a meta model / prototypes are used in the development of the user interface, and a generic environment model facilitates dynamic integration of existing user-interface widgets into the data model. Therefore data binding, field definition and screen arrangement are not performed specifically when the object oriented applications linked to the repositories are executed.

The limitation(s) lacking in the prior art, in combination with the other limitations clearly claimed in the application, are novel and unobvious.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
